

INVOKE FAS Analytics

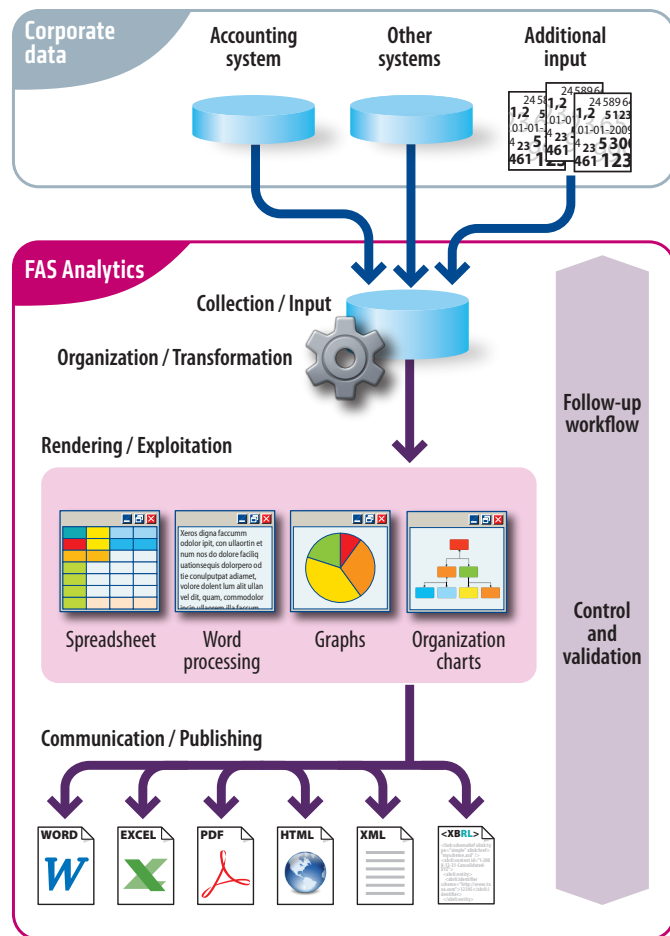

Optimize your management control processes by simplifying the production of balanced scorecards

INVOKE FAS Analytics

The solution for simplified production of your balanced scorecards

Simplified access to all your data providing you with a global view of your key indicators to optimize management of your strategy.

More than a simple data restitution tool, Invoke FAS Analytics enables you to model your own management rules and enrich your analysis by incorporating additional input.

Key benefits

Available in full-web!

- Quick to learn and use
- Office application approach of Business Intelligence
- A collaborative work environment
- Powerful statement generator
- Multi-format communication of your analyses

The Invoke added advantage: a business line spreadsheet

FAS Analytics is based on the Invoke financial spreadsheet application

Much more powerful than a traditional spreadsheet application, this tool dedicated to reporting provides you with a broad range of business line functionalities:

- Multi-dimensional analysis in each cell
- Use in input (forms), rendering (analytical statements) or mixed (assisted input) modes
- Dynamic display of information
- Production of rolling analysis

Its interoperability with Excel enables you to retrieve your existing statements through just a few clicks. In this way you can be immediately up and running in an environment with which you are already very familiar.

“Simple activation of the FAS Budget module enables you to process in the same environment as for budget planning and monitoring.”

“With FAS Analytics, only a few minutes are required to produce a new analytical statement that with Excel would require a full day”

Automate the production of your balanced scoreboards

- **Interoperability:** easy connection with your systems (accounting systems, other systems)
- **Assisted input:** additional input masks able to be personalized.
- **Real-time updating:** indicators in both the tables and commentary.
- **Reliability of information:** the last validated version is available to users.

Accelerate the distribution of key information

- **Piloting by planning:** coordination of work of the different participants.
- **Consultation by profile:** formats adapted to each reader.
- **Sharing of reports:** production of books for consultation based on personalized and standard statement templates.
- **Easy communications:** export your production to Word, Excel, PDF, HTML, XML formats.

Increase your analytical capabilities

- **Personalization:** creation of financial or operating indicators adapted to your business activity.
- **Freedom of choice** in respect to the number of areas covered and depth of analysis.
- **Continuous audit trails:** instantaneous detailed traceability of each indicator.
- **A diverse range of presentations:** large panel of formatting tools (tables, text, graphs and charts, OLAP cube).
- **Easy comparison** with previous situations (versions, historical data...) or other entities.

Measurable benefits

- ➔ **User autonomy:** construction of statements through the integrated spreadsheet tool.
- ➔ **Upgradeable system:** management of successive versions of your parameterizations.
- ➔ **Continuous audit trails,** including in your notes through the integrated word processing tool
- ➔ **Reinforce security** through the parameterization control assistants
- ➔ **Multilingual display** of reports, tables and parameterization guidelines
